CHARLOTTE WATER BACKFLOW PREVENTION SERVICE APPLICATION

Information on this form will be used to consider approval of the proposed backflow preventer (BP) installation(s) required by Article V of Chapter 23 in Charlotte City Code for the subject water services. Providing inaccurate information or changes in water-use activities at the site may result in changing the BP installation(s). Inadequate information will necessitate requiring the installation of a reduced pressure principle BP. If submitting plan drawings to Meck. Co. Code Enforcement for permitting, this form must accompany the plans. For assistance contact Plan Review section, call 704-336-2997 or 704-432-2794 or 704-432-5163.
